DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 27, 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Myers (5,452,846). Myers '846 discloses a package with a pop-up display decoration comprising: a package having a side, a foldable panel overlying at least a portion of a side of a package, the foldable panel having a fold line along which the foldable panel folds and which defines a first section and a second section of the foldable panel that overlie each other when the foldable panel that overlie each other when the foldable panel is folded along the fold line, and a pop-up display affixed to the foldable panel and formed of one or more sheets that are configured to fold into generally flat and compact configuration that is at least partially enclosed between the first and second sections of the foldable panel when the foldable panel is folded along the fold line, the pop-up

display is affixed to each of the first and second sections of the foldable panel and expands from the flat and compact configuration between the first and second sections of the foldable panels when the first and second sections overlies each other to form a dimensional display when the foldable panel is opened along the fold line to position the first and second sections extending from each other along the fold line. See Figures 7-10 embodiments. With respect to claim 2, note the band (120 in Figure 10 embodiment).

DETAILED ACTION

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Myers '846.

Claims 16-20 are directed to the obvious method of decorating the package of Myers '846.

Response to Arguments

6. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3728

Conclusion
